EDUCATION

University of Florida | *Gainesville, FL*

M.S in Computer Science

May 2027

B.S in Computer Science, Minor in Digital Arts and Sciences | GPA: 3.89

May 2026

Kyoto University | *Kyoto, Japan*

Cross-Cultural Engineering Study Abroad in Japan | GPA: 4.0

Summer 2025

EXPERIENCE

Software Engineer Intern, Trading Technology

June 2026 – August 2026

Raymond James

Saint Petersburg, FL

- Developed and shipped full-stack features for an advisor trading platform serving 8,000+ financial advisors overseeing \$200B+ in assets, leveraging Angular, TypeScript, Java, Spring Boot, and SQL.
- Resolved 15+ high-impact production issues across frontend, backend, and database layers, improving trade execution reliability and mitigating financial risk.
- Centralized debugging procedures and technical documentation into a unified engineering knowledge base, streamlining troubleshooting and improving developer productivity.

Software Engineer Intern

May 2024 – July 2024

Publix Super Markets

Lakeland, FL

- Built an automation platform from the ground up using C#, Python, and SQL, improving testing efficiency by 30% and supporting company-wide process automation.
- Presented the platform to the CEO and senior stakeholders for broader organizational adoption and process improvements.
- Developed internal tools and Python/SQL utilities that streamlined developer workflows and onboarding.

Teaching Assistant, Programming Fundamentals

August 2025 – December 2025

University of Florida Computer Science Department

Gainesville, FL

- Taught and mentored a section of 40 students in a 600+ student introductory Python course, leading weekly labs, reviews, and live debugging sessions.
- Collaborated with instructors to grade assignments, develop exercises, and provided 1:1 technical guidance on problem solving and core programming concepts.

AI Humanities Research Assistant

January 2024 – May 2025

University of Florida Classics Department

Gainesville, FL

- Developed Python tools for web scraping, AI-powered text analysis, and data processing using Pandas and NumPy to analyze 10,000+ Ancient Greek and Latin texts, integrating results into research workflows and public-facing applications.

PROJECTS

Canvas Communities | *React, TypeScript, Next.js, FastAPI, PostgreSQL, Prisma* ([GitHub](#))

Spring 2026

- Led development of a full-stack campus engagement platform featuring authentication, community management, and personalized recommendation systems.
- Integrated frontend and backend APIs, deployed the app across Vercel, Render, and Neon, and used hybrid ML recommendation signals to rank 157 seeded communities across 113 tags dynamically.

Earthquake-Preparedness Game | *Godot (C#)* ([GitHub](#))

Summer 2025

- Created a choice-driven earthquake preparedness survival game in Godot in collaboration with Kyoto University, shipping Web and desktop releases for an international educational initiative.
- Built gameplay systems including physics, inventory, HUD, and state management, improving average FPS by 25% through performance optimization and iterative playtesting.

LEADERSHIP

Secretary, Social Lead | *UF Association for Computing Machinery*

August 2023 – May 2025

- Led initiatives to strengthen member engagement and community culture within a 2,000+ member organization by organizing social, professional, and technical events.
- Coordinated workshops, guest speakers, and a multi-organization internship applyathon that increased participation and helped multiple members secure internships.

SKILLS

Languages: Python, C/C++, Java, HTML/CSS, JavaScript, TypeScript, C#, SQL

Frameworks/Tools: Node.js, Spring Boot, AWS, Express, Tailwind, Firebase, MongoDB, Postman, SonarQube, Docker, PyTorch
